“The Fourth Terminal” Book’s Dedication

CMP organized a book dedication session with the editors of the Springer book “**The Fourth Terminal – Benefits of the Body-Biasing Techniques for FDSOI Circuits and Systems**”.

CMP is the first worldwide MPW service organization offering the access to a FD-SOI technology. The 28nm FD-SOI node from STMicroelectronics is available since January 2012, almost 10 years ago.

50 dedicated books have been offered to tape-out contributors on this technology over the past 2 years, as a recognition of their contributions to the FD-SOI ecosystem.

Join us in enriching the FD-SOI ecosystem, and May the Fourth Terminal be with you!

Editors : Andreaia CATHELIN and Sylvain CLERC from STMicroelectronics

With Roberto GONELLA (ST) and Kholdoun TORKI (CMP)
